

PRACTICE ASSESSMENT 1

Task: Create the following design with HTML and CSS.

Mobile

800px and wider

Build Specifications:

- Do not worry about trying to match the exact spacing of the elements in the form.
- Must include a form that contains an h1, two labels, two inputs, and a button.
- The labels must be properly associated with their corresponding inputs for good accessibility.
- The form's width is 75% of the red section's width and has 20px padding.
- The form is centered on the red portion of the page using flex.
- The form has 10px rounded corners.
- The inputs and button have 10px rounded corners and 5px padding.
- The red and black portions fill up 100% of the viewport height regardless of screen size.
- The black section with the bullseye is not displayed on mobile (display: none)
- A **media query** with min-width of **800px**
 - The red portion takes up $\frac{1}{3}$ of the page horizontally while the black portion takes up $\frac{2}{3}$ of the page horizontally. Use flex properties to achieve that functionality.
 - The bullseye is constructed with 3 divs
 - Outer div has a width and height of 300px and a background color of red
 - Middle div has a width and height of 200px and a background color of white
 - Inner div has a width and height of 100px and a background color of red
 - The bullseye is centered on the black portion of the page using absolute positioning.

Grading Criteria:

There are a total of ten points. The assessment will be graded only on the criteria below.

1. Must include a form that contains an h1, two labels, two inputs, and a button.
2. The labels must be properly associated with their corresponding inputs for good accessibility.
3. The form's width is 75% of the red section's width and has 20px padding.
4. The form is centered on the red portion of the page using flex.
5. The form has 10px rounded corners.
6. The inputs and button have 10px rounded corners and 5px padding.
7. The red and black portions fill up 100% of the viewport height regardless of screen size.
8. At 800px+, the red portion takes up $\frac{1}{3}$ of the page horizontally while the black portion takes up $\frac{2}{3}$ of the page horizontally. The black portion is NOT displayed below 800px.
9. The bullseye displays as three concentric circles: 100px red, 200px white, 300px red.
10. The bullseye is centered on the black portion of the page using absolute positioning.
